# HAWID stamp mounts

# The HAWID range of stamp mounts

## 1. HAWID strips

217 mm long, in various heights. Here, too, the strip is 4 mm higher than the given stamp size. Cut the width to your requirements.

## 2. HAWID block mounts

In a variety of sizes for postal stationery, blocks of stamps, miniature sheets etc.

## 3. HAWID 'cut-to-size' mounts

For all popular stamp formats. Here, too, the strip mount is 4 mm bigger in size, so the stamp can be placed in the centre, as if in a frame.

Clear stamp mounts are ideal for e.g. organising pre-printed (illustrated) pages. By contrast, the stamp mounts featuring a black backing film highlight the stamp's perforated edge, showcasing the actual stamp.

## 3 ways to insert

### HAWID stamp mount:

Stamp can be inserted into the mount either from the side or from the top. Perfect for unusual stamp sizes/shapes due to the 'cut-to-size' mount.

### Double weld (d) = sealed at the top and bottom:

Two parallel welds and a gummed base backing film. Stamps are inserted from the side, meaning that the front cover does not open up, especially useful with larger stamp sizes.

### Schaufix (s) = sealed at the top and bottom, opens at the back:

Two parallel welds and a backing film that is cut through the middle enable larger sized stamps to be inserted easily and prevents the front from opening.
